## Pin Configuration

## Description

TPW4157 is high performance Single Pole/Double Throw (SPDT) analog switches. The devices feature ultra low R<sub>ON</sub> of 1.15Ω maximum at 4.5V V<sub>CC</sub> and will operate over the wide V<sub>CC</sub> range of 1.65V to 5.5V.

The TPW4157 features very low quiescent current even when the control voltage is lower than the V<sub>CC</sub> supply. This feature services the portable applications very well allowing for the direct interface with processor general purpose I/Os.
